Saudi Arabia Vision 2030

“Our Vision is a strong, thriving, and stable Saudi Arabia that provides opportunity for all. Our Vision is a tolerant country with Islam as its constitution and moderation as its method. We will welcome qualified individuals from all over the world and will respect those who have come to join our journey and our success.

We intend to provide better opportunities for partnerships with the private sector through the three pillars: our position as the heart of the Arab and Islamic worlds, our leading investment capabilities, and our strategic geographical position. We will improve the business environment, so that our economy grows and flourishes, driving healthier employment opportunities for citizens and long-term prosperity for all. This promise is built on cooperation and on mutual responsibility.

This is our “Saudi Arabia’s Vision for 2030.” We will begin immediately delivering the overarching plans and programs we have set out. Together, with the help of Allah, we can strengthen the Kingdom of Saudi Arabia’s position as a great nation in which we should all feel an immense pride.”

His Royal Highness Prince Mohammed bin Salman bin Abdulaziz
Crown Prince, Vice President of the Council of Ministers Chairman of the Council of Economic
and Development Affairs.

LOSS PREVENTION PROGRAMME

1. GENERAL PROCEDURE

1. The primary objective of this program is to promote general safety practices and to explain the needs and importance of the safety on site and prevention of accidents. Safety should be considered as a matter of prime importance.

2. PLAN OF ACTION

In order to achieve the above-mentioned goal, the following courses of action should be put into effect.

- 2.1 Safety orientation of new employees.
- 2.2 Educate employees explaining in detail the necessity and importance of personal safety and that of equipment.
- 2.3 Maintain good housekeeping in all areas.
- 2.4 Enforce safety rules and regulations.
- 2.5 Organize accident prevention committee.
- 2.6 Hazard elimination through systematic inspection and use of protective gear and the right tool for an appropriate job.
- 2.7 Strict adherence to the loss prevention requirement of Saudi Aramco, safety standards and applicable to Saudi Arabian Laws.

3. PROGRAM:

3.1 Planning safety in engineering and estimates preparation:

In the planning and estimate preparation stage a thought for the period of consideration, studies shall be made by the engineers to ensure adequate safety factors in design and erection of temporary structures and staging.

- 3.1.1 Adequate monetary allocation to provide for items such as trench bracing, barricades, signs work platforms, personal protective equipment and other items necessary for the protection of employees, equipment, materials, and members of general public and their property.
- 3.1.2 System shall be established where by plans and procedures involving hazards to men, materials, equipment and adjacent property could be studied and reviewed with proper authorities for necessary precautionary measures.

3.2 SAFETY MEETING:

Before starting up the job, key personnel should meet to discuss accident prevention, study job layouts, determine plans and schedules, also emphasize requirements and elaborate procedures. Through inspection of job site and elaborate procedures. Through inspection of job site and adjoining procedures shall be done and a brief supplemental safety programmed will be developed and distributed to supervisory personnel assigned to jobsite.

- 3.2.1 Weekly safety meeting for supervisory personnel to review accidents that occurred during the previous week, take note of safety deficiencies and establish measures, job hazards, contemplated control, protective e equipment and personnel training should be covered.
- 3.2.2 A ten-minuted tools box meeting shall be held once week under the direction of foreman and assistant safety personnel. Accidents and near-accidents should be discussed and present action to prevent recurrence. Forman will explain the safe way-performing job. From time to time superintendent and other key personnel shall also attend the meetings on rotation basis.
- 3.2.3 Records will be kept spelling out the meeting data who conducts the meeting and summery of discuss which will be forwarded to project engineer.

3.3 EMPLOYEES SELECTION

We should hire the appropriate man to the right job. Dispel the fact that labor shortage in some areas in acute specialty for skilled manpower, every effort is being made by the management to see to it that only physically for workers are selected, this is one important fact to preventing accidents that our management has given a reconsideration, good physical condition is of precipitance for employees under Saudi Arabian climate conditions, particularly vehicle and equipment operators.

3.4 CRAFTSMAN TRAINING:

Daily safety contact of craftsman is one of the move effective ways of training our employees. Safety as part construction can be emphasized here as the foreman explain the “that” how” where” and why” of the workers.

- 3.4.1 The following subject shall be discussed in the employee’s safety induction training.
 - 3.4.1.1 Hazards on the job site.
 - 3.4.1.2 Necessary productions against the above hazards.

- 3.4.1.3 Personnel protective equipment.
- 3.4.1.4 Ladders and Scaffoldings.
- 3.4.1.5 Housekeeping and sanitation.
- 3.4.1.6 Lift devices and materials handling.
- 3.4.1.7 First devices and materials handling.
- 3.4.1.8 Fire protection and control.
- 3.4.1.9 Reporting injuries and unsafe conditions.
- 3.4.1.10 Safety rules and regulations and discipline.
- 3.4.1.11 Responsibility in safety.

3.4.2 In addition to the above topics the following procedural guidelines shall be emphasized to the workers. The shall include.

- 3.4.2.1 Welding and cutting equipment.
- 3.4.2.2 Hand and portable tools.
- 3.4.2.3 Ladders and scaffolding.
- 3.4.2.4 Cranes and rigging equipment's and practices.
- 3.4.2.5 Excavation, trenching and shoring.
- 3.4.2.6 Electrical installation and equipment.
- 3.4.2.7 Highway and street construction.
- 3.4.2.8 Work permit system.

3.5 SAFETIES AND TRAINING EDUCATION:

Training is one of the most important responsibilities of management and accordingly there should be a continuing effort to help supervisory personnel in carrying out their management function in order to complies this, key personnel must be trained first before they can become competent instructors.

3.5.1 Supervisor / Foreman Training

Most of our foreman are selected from construction crew and elevated to Supervision on the basis of their craft skis. They also possess the certificate to take work permits. Regardless of whether the foreman has been promoted from the ranks, within the company or hired from outside, he shall be given supervisory training and understanding of his responsibilities, both in accident prevention and direction of work. The following topics shall be covered during the foreman training.

- 3.5.1.1 Accident prevention organization
- 3.5.1.2 Personal protection
- 3.5.1.3 Scaffolding and ladders
- 3.5.1.4 Housekeeping, sanitation and first aid.
- 3.5.1.5 Welding and cutting
- 3.5.1.6 Flammable gases and liquids
- 3.5.1.7 Excavation and shoring
- 3.5.1.8 Concrete construction / steel erection
- 3.5.1.9 Hoist, cranes and rigging
- 3.5.1.10 Traffic control
- 3.5.1.11 Heavy equipment, motto trucks
- 3.5.1.12 Tools-hand, power, pneumatic
- 3.5.1.13 Work permits procedures
- 3.5.1.14 Repair shops and garbage's

3.6 EMPLOYEE ORIENTATIONS AND INDOCTRINATION IN SAFETY:

3.6.1 Following the selection processing, the employee should be given a brief orientation of the company's safety policies. A brochure of safety rules, in addition to the oral orientation will be given to each new employee before he is instructed to the supervisor.

3.6.2 The supervisor should then review the specified hazards and safety rules related to the employee's assignment and introduce him to his fellow workers. Whenever possible place the new employee with an experienced worker who can aid him in promoting safety habits. After a few weeks a follow-up orientation should be conducted reiterating what has been previously said about the company's interest in accident prevention.

3.6.3. A record shall be kept on each employee completing the orientation course.

3.7 CORRECTING UNSAFE ACTS OR CONDITIONS:

Generally, accidents result from two sources, unsafe acts and / or conditions, key personnel should make it a standard practice to look for unsafe acts and conditions.

On every visit to the job, and to the attention of the superintendent in charge, demanding immediate correction, when conditions are extremely serious, and the lives of the workers are in jeopardy, they should be corrected at once. Frequent inspection of the site should be made a list of violation noted for use and discussion at next safety surveys of the jobsite, safety committee should tour the premises on schedules at regular intervals.

3.8 ACCIDENTAL REPORTS AND RECORDS:

The purpose of accident investigation is to provide information to the management so that preventive measures can be instituted to ever-similar incident future. Supervisor conducting the investigation should not view his findings from fault finding angle injury and damage reports shall promptly be made and circulated to all concerned for proper precautionary measures. A copy of this investigation report should be sent the safety officer to ensure that follow-up measures are carried though.

All accident including “near misses” should be investigated so that appropriate action to prevent recurrence can be made, more serious accident should be detailed in narrative form.

4. PROCEDURES

4.1 Personal Protection

The company shall provide the necessary protection where the need warrants it. Adequate quantity of different types of protective devices shall be maintained in store for specific usage. All levels of supervision shall be held responsible for seeing that his men wear the proper protective equipment and that it is kept in good condition.

4.1.1 Protection

For all construction work exposure, head protection is must. Hard hats must be worn at all times on the jobsite.

4.1.2 Hand Protection

Whenever needed, construction workers shall wear working gloves in good condition, which are suited to the type of work involved.

4.1.3 Feet Protection

It shall be an all times requirement of all employees to wear their safety shoes in good repair sneakers, sandals, flip-flops and shoes that have slits or have holes in them are not.

4.1.4 Eye and Face Protection

Approved eye and face protection shall be worn the warranted by the exposure.

4.1.5 Protective equipment for Specific Use

Other personal protective equipment for specific usage shall be taken into consideration as ar when the need arises.

Saudi Aramco E-Reference No. 0006752

Registration Approval Letter

June 20, 2023

Attention : FAYAD GLOBAL CONTRACTING COMPANY LTD

CR Number : 2050157359

Supplier Type: Service Provider Only

Country : Saudi Arabia

We are pleased to inform you that FAYAD GLOBAL CONTRACTING COMPANY LTD is now registered in the Saudi Aramco Supplier Management System under Vendor Code No. 10110651, provided your company continues to meet all relevant Saudi Arabian and Saudi Aramco standards.

This registration, however, should not be construed as a commitment by Saudi Aramco to procure from you. Being registered as a supplier only grants your company the opportunity, along with other registered sources, to respond to requests for submitting proposals in accordance with Saudi Aramco's established policies and procedures. All procurement instruments including but not limited to service contracts, purchase agreements, or purchase orders will be issued based on the name and address included in your commercial registration (CR), as stated in your Supplier Registration.

Saudi Aramco wishes to remind you that being recognized as a supplier carries with it serious obligations and responsibilities to act in a legal and ethical manner. We wish to remind you of the Saudi Aramco Supplier Code of Conduct (SCOC) which you acknowledged. Failure to abide by the principles set forth in the SCOC can result in adverse actions being taken by Saudi Aramco against you including suspension of you as a supplier. Saudi Aramco also expects each of its suppliers to satisfy each of the requirements of any procurement instrument which might be placed and to act responsibly and reliably as a supply chain supplier.

Material Suppliers should apply for Saudi Aramco Supplier Portal access by forwarding a request to portal-registration@aramco.com. The Supplier Portal is the main electronic business tool used between Saudi Aramco and its suppliers and serves to improve the flow and accuracy of key supply chain information.

For further information or assistance please contact the Saudi Aramco Supplier Help Desk by forwarding a request to SupplierHelpDesk@aramco.com or via the unified call center 800-116-1168 for In-Kingdom suppliers or +966 (11) 290-8950 for Out-of-Kingdom suppliers.

Moamar Khazal Al Usaimi, Supervisor
Supplier Registration Unit
Supplier Relationship Management Div

It is the responsibility of the supplier to update Saudi Aramco Supplier Registration Profile through Ariba for the following:

1. Change of Name / Commercial Registration Number / Address / Owner(s)
2. Any change of the supplier location
3. Discontinue supply of approved commodities (9COMs and 9CATS)

This is an electronically generated letter by Saudi Aramco. To verify Supplier approval status, please contact Supplier Help Desk at supplierhelpdesk@aramco.com
